

Nature's Answer

**Anpario plc Corporate
& Product Brochure**

Anpario's mission is to add value throughout the lives of animals. Combining knowledge, science and nature to provide products that enhance the natural development of livestock animals to maximise producers' profitability.

Welcome to Anpario.

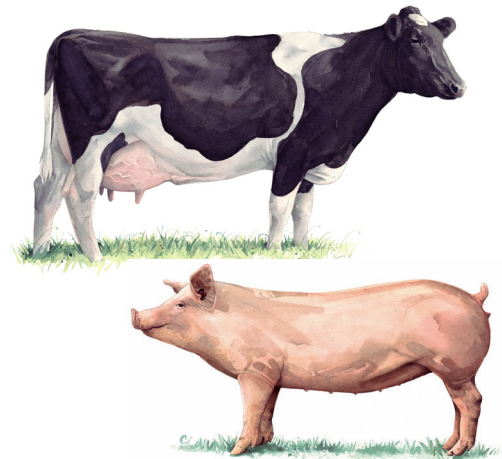

Promote healthy microbiota.

Manage undesirable microbes.

Optimise lifetime performance to achieve genetic potential and optimise sustainable producer efficiency.

Anpario plc is a world-leader in producing Specialist Feed Technologies which are both innovative and tailored to meet the requirements for healthy food from an ever increasing population.

Anpario's products are used in over 80 countries through established sales and distribution networks, including a number of wholly owned subsidiaries in key markets.

Our main focus is understanding animals' intestinal health and nutrition, so we can help our customers achieve optimum animal performance, with good return on investment, boosting ROI and efficiency in today's modern livestock production systems.

A Brief Introduction

Our technologies are developed, produced and dispatched directly from our pioneering, quality assured manufacturing plant in the UK. We have over 30 years of expertise in the agricultural sector and we work with key research institutes and universities across the world to evaluate our innovative, cutting-edge technologies.

The Anpario portfolio is divided into four categories: Health and Performance; Toxin Management; Feed Quality; Hygiene and Insect Control. Anpario's technologies come in specially designed packaging to guarantee consistency of the product and an excellent shelf life.

MERIDEN-STIM™

Nature's Answer from **Anpario**

美瑞高

Naturally more profitable.

Supports animal health and performance.

- ✓ Supports the animals' natural defensive mechanisms and immune function
- ✓ Supports gut health for optimal growth
- ✓ Supports the animal through periods of stress
- ✓ A consistently high quality, 100% natural, oregano essential oil feed additive

Nature's Answer

Salkkil™ 赛可利

Nature's Answer from **Anpario**

KILLS SALMONELLA IN THE FEED AND BEYOND

- ✓ Market leading acid based eubiotic
- ✓ Kills *Salmonella* in the feed
- ✓ Protects poultry gut health to produce robust birds
- ✓ Improves egg quality and number of 1st grade eggs

✓ **Anpario**
Nature's Answer

pHorce™ 福适

Nature's Answer from Anpario

Proven Triple Action

Anti-viral. Anti-bacterial. Anti-fungal.

- ✓ Proven to be effective against: SVA, PRRS & PEDV*
- ✓ Low inclusion, low cost
- ✓ Formaldehyde free
- ✓ Unique carrier technology for optimal acid release

Anpario have worked with Acid Based Eubiotic (ABE) feed additives for more than 30 years with a particular focus on pathogen control.

pHorce, which is **formaldehyde free**, delivers effective **anti-bacterial** and **anti-fungal** action. It has now been proven* for its **anti-viral** action to further ensure the biosecurity and safety of future feed and livestock production.

* Dee SA, Niederwerder MC, Edler R, et al.
An evaluation of additives for mitigating the risk of virus-contaminated feed using an ice-block challenge model.
Transbound Emerg Dis. 2020;00:1-13.

Prefect™ 普肥特

Maximising Gut Health.

Prefect is developed to help maintain a healthy gut microbiota in monogastric animals.

Formulated from a combination of acids, including butyric and formic acids. Contains fructo-oligosaccharides (FOS) to help support animal's digestive function.

Help control potentially pathogenic bacteria, including but not limited to, Salmonella spp.

Nature's Answer

Neutox

Anpro *inside*

Nature's Answer from **Anpario**

新霉净

Complete Feed Security.

- ✓ Binds secondary fungal metabolites in the feed
- ✓ Yeast cell wall can help control pathogenic bacteria
- ✓ Broad spectrum, low inclusion
- ✓ Naturally defends your livestock

 **Anpario**
Nature's Answer

Anpario's portfolio of innovative products work in harmony with the natural aspects of the animal's biology to promote healthy growth. The benefits of Anpario's products have not only demonstrated their value to the animals that have been fed directly, but also to the progeny that they produce.
