

ONCOLOGY

AilseVax	Immuno-oncology vaccines
Cancer Research UK	World leading cancer research organisation
Jazz Pharma	Neuroscience, essential tremor, haem-oncology
Therakind	Paediatric leukaemia, arthritis

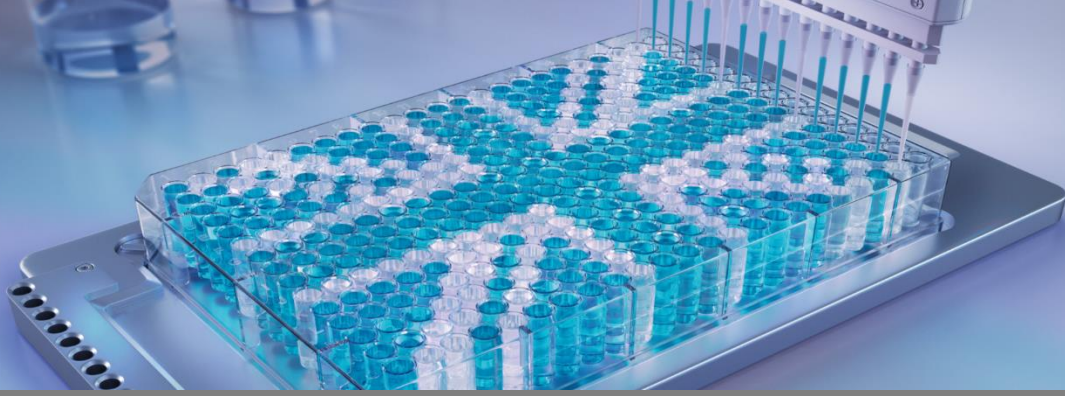

PLATFORM TECHNOLOGIES

Arjuna Therapeutics	Novel modalities for cancer and non-cancer indications
Elasmogen	Protein technology platform for oncology and autoimmune diseases
Fusion Antibodies	Antibody discovery and engineering, multispecifics, cell line development
SiSaF	Rare diseases RNA therapeutics genetics skeletal disorders, corneal dystrophy
Vaccitech	T cell immunotherapy and viral vector vaccines, anti-HPV, anti-HBV

DRUG DISCOVERY

Amplify Discovery	AI and machine learning techniques for drug discovery
CCDC	World-leading expert in structural chemistry data, software and knowledge
Glamorous AI	AI in drug discovery, DNA-encoded library small molecule drug screening
Congenica	World leading genomic medicine and bioinformatics platform
Human Centric Drug Discovery	Data-driven neurology drug discovery

THERAPEUTICS

LD Collins	Hormone therapeutics, progesterone
LifeArc	Drug discovery pipeline, novel antibody therapeutic for Alzheimer's Disease
Mereo	Cancer, rare diseases, Acute exacerbations of COPD
SGS Capital	Male fertility, inflammation

RESEARCH & DEVELOPMENT PROVIDERS

Cellexus	Single-use airlift bioreactors for cell culture
G&L Scientific	Regulatory affairs and quality assurance solutions
IP Group	Develops and maintains a pipeline of intellectual property-based companies
Manchester BIOGEL	3D cell culture hydrogel reagents
PHASTAR	Statistical consulting, clinical trial reporting, data management services
ProImmune	Antigen characterisation & protein engineering, immune assay kits
Retrogenix	Cell microarray, drug target identification and mechanisms of action
